

I am writting you regarding the concideration of the new broadcasting system LPFM. I currently enjoy K-LOVE in my car and at home. I'm afraid that if this new system was implimented I would loose the ability to hear KLOVE at home. I live in a rural area where our radio stations are limited and have found this station to barely come in now. If this new system was to come into effect I'm sure the other stations would overrun KLOVE. Please reconsider this as it would put us small town's at the mercy of the bigger affiliated stations without a voice on the kind of music we want. Thank You, Lori S. Winn
